

Family Conference 2021

Breakout #7

EdTech for Parents Bootcamp

Leanne Husk, Assistive Technology Instruction Specialist, Bridges Canada

With technology infused in so much of student learning today, it may be overwhelming and a bit mystifying about how you can help. Come and learn about the tech tools students are using in classrooms today, and how you can support their skill development at home to help them to become confident, successful learners!

We will explore a variety of technology tools, features and strategies that can ease frustration, foster independence and support students with becoming stronger and more efficient learners across the curriculum.

With a firm belief that technology in our classrooms is the “game changer” for so many of our students today, it has become Leanne Husk’s passion to see it implemented and used to its potential. Combined with strategic teaching and implementation, education technology opens up curriculum to struggling learners, truly making it accessible to all.

Specializing in learning disabilities, Leanne has spent her career introducing, training and mentoring students, their families and educators to the limitless potential of education technology. She is an energetic, dynamic, dedicated individual who, over the years, has gathered a wealth of knowledge and experience, devoting herself to creating positive, successful, enjoyable, interactive and inclusive learning environments for the students and teams

she supports.
